Introduction:

Secured Strategy in Nest Plus allows you to use strategies based on technical charts provided by your broker.

Secured strategies will show you:

- The Strategy Name.
- Pricing for the strategy.
- A short description of the strategy.

The user will be able to view the list of strategies (strategy name and description) and back-test the strategies. If the user is satisfied with the results, he can subscribe to the strategy to apply it in the live market.

Subcribing and viewing the Published startegies:

The Secured strategies are used through your Nest or Now Trading terminals:

Details of the strategy you selected - B101 NCDEX FUT
This is buy and sell strategy for NCDEX Futures.This strategy gives buy first and buy exit (sell) as well as sell first (short) and sell exit (cover).This strategy is to capture the swings of the market and the trades can be intraday as well as carry forward.Trader need not know any technical analysis or financial analysis, one can just back test the above strategy and decide to run on the the scripts one likes. It is plug and play kind of semi auto trading application. One should back test and understand the draw down and the result at the end of said period.Recommended time frame is 60 minutes and script should be one with high liquidity . Traders should square off (Manually) the trades prior to delivery period, if they don't intend to take or give delivery. Trader should enter Buy exit or Short exit trades only if they have Buy position open or Short position open. One can also back test and trade live on Agri products along with other commodities.
